DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15, 30, 31, 33-52, and 55-59 drawn to a device for skinning carcasses, classified in class 452, subclass 125.
- II. Claims 53, 54, and 60, drawn to a method for skinning chicken, classified in class 452, subclass 130.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the device of invention I can be used to skin any type of animal, where the method is directed “particularly to poultry” (See claims 53 and 60). Further invention I does not require that the skin is wound around one of the two rollers (See claim 53), and that the skin is pulled off from both side of the carcass and slid from the rollers (See claim 60).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 3644

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
